

ethos
chain

Whitepaper Oficial - 2025

1. Overview

ETHOS CHAIN is a Layer 2 solution built on the BNB Chain, delivering unprecedented speed, security, and stability. Our mission is to accelerate Web3 adoption through a robust infrastructure and accessible tools for developers and scalable projects.

2. Innovative Solutions

- ETHOS MULTISEND: Airdrop platform for up to 100 wallets per transaction on EVM networks.
- ETHOS TOKEN DEPLOY APP: Simplified smart contract deployment.
- Layer 2 with RWA and Loans: Real-world asset tokenization, crypto-backed loans, and fiat/stablecoin payout options.

3. Tokenomics

Token: Ethos Chain (ETS)
Decimal: 18
Total Supply: 20,000,000 ETS

Distribution:
- 30% Development
- 20% Marketing and Listings
- 10% Mining
- 30% Presale
- 10% Team

4. Transaction Fees

Fee Model: 8% Buy / 8% Sell

- 1% Liquidity
- 1% Referrals
- 6% Marketing, Development, and Team

Distribuição das Taxas 8/8

5. Security and Reliability

- SAFU Contract: Secure, auditable, and transparent.
- No blacklist: Every wallet has equal access.
- Permanent Trading: Once enabled, trading cannot be disabled.
- Fee Cap: No configuration may exceed 25% total tax.

These mechanisms ensure fairness, decentralization, and protection for all users.

6. Conclusion

A ETHOS CHAIN representa a vanguarda da inovação na BNB Chain. Com ferramentas poderosas, segurança e acessibilidade, moldamos o caminho para um ecossistema mais eficiente e descentralizado. ETHOS CHAIN é mais que tecnologia - é uma nova filosofia.

7. Roadmap

Fase 1 - Fundação

Phase 1 - Foundation

- Official website launch
- ETS token presale

Phase 4 - Consolidation

- Listing on CoinMarketCap (CMC)

Phase 2 - Market Entry

- Official launch on PancakeSwap
- Listing on CoinGecko

Phase 3 - Product Expansion

- Launch of ETHOS MULTISEND on Testnet
- Launch of ETHOS MULTISEND on Mainnet
